## **Tree Plantation**

Under Article 48A of the Directive Principles of State Policy, The State shall endeavor to protect and improve the environment and safeguard the forests and wild life of the country. In addition, under 51A(g) of the Fundamental Duties of India it shall be the duty of every citizen to protect and improve the natural environment including forests, lakes, rivers and wild life, and to have compassion for living creatures.

The State Government of Maharashtra has taken up the 33 crore plantation program intended to increase the forest cover in the state from the current 20% to the nationally mandated 33% of Maharashtra's land area. With all the due respect to state government the Tree Plantation programme was organized JSPMS JIJAMATA COLLEGE OF PHARMACY SARATI. Tree Plantation programme was held on 25/09/2023. The D.Pharmacy students actively participated in the programme. Management Committee, Principal, Dept HOD, Faculty, NSS Volunteers and students actively participated in plantation. Our faculty had also explained about the trees and the importance of tree plantation.

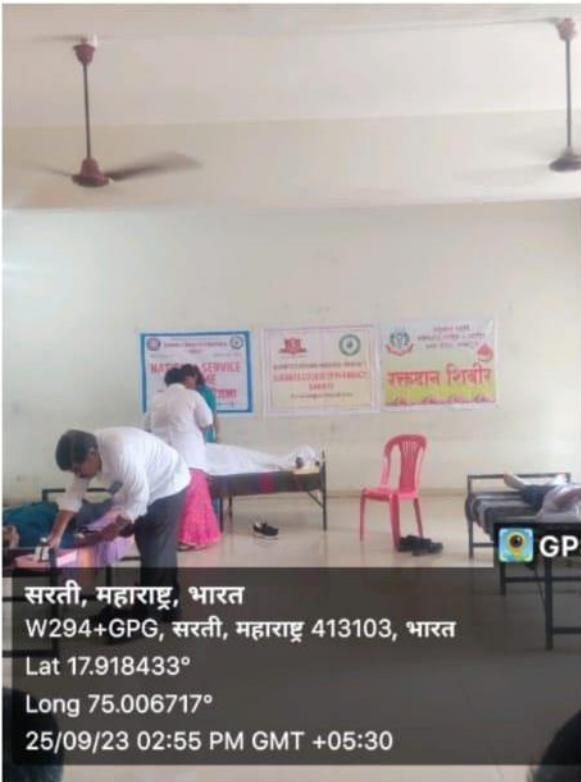

Here are some of the glimpses of the tree plantation programme held under Green Army Mission to protect the environment.

**BLOOD DONATION EVENT**

“Once a blood donor, always a lifesaver.” A single pint can save three lives, a single gesture can create a million smiles. A matter of 15 minutes and 350ml of your blood won't take away much from your day, but for those 3 lives in need it can mean a life. In collaboration with the 'Sahakar Maharshi Shankarrao Mohite Patil Blood Bank' we hosted and carried out a blood donation event. Students registering to donors running up and down preparing with their sleeves up and hearts out to give blood, we were warmed to see the social awareness and dedication of the students and faculty of Jijamata College of Pharmacy, Sarati. Making sure that the donors were kept healthy and hearty after the donation, we had them be served with appropriate glucose supplements. They smiled a smile so wide!

**WORLD AIDS DAY**

College of Pharmacy, NSS unit, sarati, organized “World AIDS Day” on 01.12.2023. Each year, on 1st, December, the world commemorates World AIDS Day. People around the world unite to show support for people living with HIV and to remember those who have died from AIDS-related illnesses. Each World AIDS Day focuses on a specific theme, which this year will be Equalize. United Nations Programme on HIV/AIDS (UNAIDS) is urging each of us to address the inequalities which are holding back progress in ending AIDS. This year's theme joins a growing list of challenges that World AIDS Day has alerted people too globally. Teaching, non-teaching staff and NSS P.O's, students ,HOD's gathered at College campus. Associate principal explained about the HIV/AIDS to the students and made them aware on HIV/AIDS issues. All the faculty, NSS P.O's, NSS volunteers participated in awareness rally in and around college premises and Premavathipet and rise the slogans to create awareness among the public.

**NSS CAMP REPORT**

The National Service Scheme (NSS) is a government-supported program that aims to develop the personality and character of students through community service. One of the key activities of the NSS is the annual NSS camp, which brings together students from different universities and colleges to participate in community development activities. In this report, we will provide an overview of a recent NSS camp, discuss the activities and achievements of the camp, and highlight the challenges encountered and recommendations for future camps.

The NSS camp we will be discussing was held in a rural area in the outskirts of the city. The objectives of the camp were to promote community development, environmental conservation, and social awareness among the participants. The activities of the camp included tree planting, construction of sanitation facilities, health and hygiene campaigns, and cultural exchange programs. The camp was organized by the NSS unit of the host university, with the support of the local government and community leaders.

During the camp, the participants engaged in various activities that had a significant impact on the community and environment. The tree planting exercise, for example, helped to restore the degraded forest cover in the area, while the construction of sanitation facilities improved the hygiene and sanitation conditions of the local community. The health and hygiene campaigns sensitized the community on the importance of good health practices, while the cultural exchange programs promoted social integration and harmony among the participants. Overall, the camp was a success, and the achievements were evaluated based on the number of trees planted, the number of sanitation facilities constructed, and the level of community participation in the activities.

The camp received positive feedback from the participants and the local community members. The participants reported that the camp helped them develop their personal and social skills, and provided them with an opportunity to engage in community service. The local community members appreciated the efforts of the participants in improving the local environment and spreading awareness about health and hygiene. However, the camp also had some weaknesses, such as lack of adequate resources and facilities. To improve future camps, it is recommended that more resources and facilities be provided, and that the selection criteria for participants be more rigorous to ensure maximum participation and engagement.

In conclusion, the NSS camp provided an excellent platform for young people to engage in community service and foster their personal and social development.

The camp was successful in achieving its objectives, and the participants and community members appreciated the efforts of the organizers. However, there is always room for improvement, and the recommendations provided in this report can be used to enhance the effectiveness of future camps. Overall, the NSS camp was a valuable experience for all the participants and contributed to the promotion of social welfare and community development.

Despite the success of the camp, there were some challenges encountered during the implementation of the activities. One of the main challenges was inadequate funding, which affected the quality and quantity of the materials used in the construction of the sanitation facilities. Another challenge was the limited participation of the local community in the activities, which affected the sustainability of the projects. To address these challenges, we recommend that future camps should seek more funding from the government and other stakeholders, and involve the local community in the planning and implementation of the activities. We also recommend that the projects and activities carried out during the camp should be sustainable, by involving the local community in the maintenance and management of the projects.

In conclusion, the NSS camp is a valuable program that provides students with an opportunity to develop their skills and contribute to the development of their communities. The camp we discussed in this report was successful in achieving its objectives, but also faced some challenges that need to be addressed in future camps. We hope that our recommendations will be taken into consideration, and that future camps will be even more successful in promoting community development, environmental conservation, and social awareness.

The National Service Scheme (NSS) is a government-sponsored program aimed at promoting social welfare and community development among young people. As part of this program, a NSS camp was organized recently with the objective of engaging young people in community service and fostering their personal and social development. This report provides an overview of the camp, highlights the activities and achievements during the camp, and offers recommendations for future camps.

The NSS camp was held at a rural location in the outskirts of the city and lasted for seven days. The camp aimed to provide a platform for young people to engage in community service and social activities, while also promoting their personal and social development. The participants were selected based on their interest and commitment to community service.

The camp had a rigorous daily schedule that included physical activities, group discussions, and community service projects. The participants were divided into small groups and assigned various community service projects, such as cleaning a nearby village, planting trees, and conducting awareness campaigns on health and hygiene. The participants also attended workshops on leadership, communication, and team building, which helped them develop their personal and social skills. The camp also provided a platform for participants to interact with each other and share their experiences and perspectives.

The National Service Scheme (NSS) is a program that encourages students to participate in community service and social activities. As part of this program, a NSS camp was organized for students to engage in various activities aimed at promoting social awareness and responsibility. This report will provide an overview of the activities conducted during the camp, the impact it had on the participants and the community, and the challenges faced during the camp and recommendations for improvement.

During the NSS camp, various activities were conducted to promote social awareness and responsibility among the participants. One of the primary activities was cleanliness drives and waste management. Participants were encouraged to clean the surroundings and properly dispose of waste to maintain a clean environment. Additionally, awareness programs on health and hygiene were conducted to educate the participants on the importance of maintaining good health and hygiene practices. Furthermore, skill development workshops were organized, including first aid training and computer literacy sessions, to equip the participants with essential skills for personal and professional development.

The NSS camp had a significant impact on the participants and the community. The activities conducted during the camp helped to improve the participants' awareness and understanding of social issues. They developed leadership and teamwork skills through working together during the various activities. Furthermore, the camp enhanced the participants' sense of responsibility towards the environment and society. The community also benefited from the camp, as the cleanliness drives and waste management activities helped to improve the overall hygiene and cleanliness of the surroundings.

Despite the success of the NSS camp, some challenges were faced during the camp. One of the main challenges was limited resources and funding for organizing the camp. This resulted in some activities being limited in scope and scale. Additionally, some volunteers did not participate actively, which affected the

overall success of the camp. Time management and coordination issues also posed a challenge during the camp. To improve the camp, it is recommended that more resources and funding be allocated to the program. Further efforts should also be made to encourage active participation from all volunteers, and better time management and coordination strategies should be implemented.

In conclusion, the NSS camp was a successful program that helped to promote social awareness and responsibility among the participants. The various activities conducted during the camp helped to improve the participants' understanding of social issues, develop leadership and teamwork skills, and enhance their sense of responsibility towards the environment and society. However, the camp also faced some challenges, including limited resources and funding, lack of participation from some volunteers, and time management and coordination issues. To improve the program, it is recommended that more resources and funding be allocated, active participation be encouraged, and better time management and coordination strategies be implemented.
